PD Telecare

A service designed to expand your team's capacity and prevent avoidable patient drop off

A dedicated team of PD Telecare registered nurses and qualified technicians proactively solving technique related issues with patients and alerting you to insights for clinical interventions

High rates of technique failure, within the first 12 months of PD, are a key factor in poor PD retention rates worldwide.¹

- Dialysis can be overwhelming**
PD can be an emotional burden for patients and caregivers.
- Nursing resources are stretched**
Ongoing work force shortages combined with an increasing patient population impact time for direct patient care.
- Challenges to using data insights**
Conflicting priorities may lead to sub-optimal use of remote patient management and its data insights.

PD Telecare is here to help

PD Telecare is designed to be an extension of your team.

A dedicated team, comprised of PD Telecare registered nurses and qualified technicians, monitor and analyze **Sharesource** data – proactively solving technique related issues with patients and alerting you to insights for clinical interventions that support personalized, proactive patient care.

PD Telecare relieves some of the burden on your nursing team and gives new and established patients proactive support for their best chance of PD success

1. Setting Patients up for PD Success

The PD Telecare team enhances treatment effectiveness by monitoring **Sharesource** data, providing clinical and technique related insights, and proactively supporting patient triage and troubleshooting.

“*With PD Telecare we incorporated an extra set of eyes for technique issues, and an extra set of eyes for clinical support*”

The PD Telecare team, highly skilled in interpreting SHARESOURCE data, helps you optimize the full value of RPM

- > RPM has been shown to increase proactive activities by 34% and decrease reactive activities by 17%⁴
- > APD patients supported by **Sharesource** RPM stayed on therapy 3.2 months longer, compared to APD patients without RPM (p<0.001)⁵
- > RPM may reduce hospitalizations, ER visits, home visits, and unplanned clinic visits^{4,5}

2. Proactive Patient Support

PD Telecare:

- > Enables patients to stay connected with their care teams and receive the proactive, individualized support they need for the best possible experience with PD²
- > Supports patients with proactive interventions that foster good habits and technique, improving treatment adherence and self-management skills²
- > Encourages patient engagement and satisfaction through timely, personalized follow-up²

3. Expanding your team’s capacity

PD Telecare:

- > Expands your team’s capacity and expertise - enhancing nursing resources and optimizing data insights for timely, efficient patient care²
- > Aims to simplify clinical workflows and enhance productivity by reducing the burden on your team²
- > May help reduce therapy complications and the associated cost and resource implications through proactive interventions
- > Makes it easy to track data and assess the impact of PD Telecare on your clinic via dashboards and analytics

“*We have reduced, by more than 50%, what falls into the controllable loss category, primarily patient loss/modality change within 6 months*”

*Data for US

 **47%** REDUCTION IN FIRST 90 DAY DROPOUT RATE²

 **645+** CLINICS ENROLLED^{7*}

 **7,300+** PATIENTS SERVED^{7*}
